MARK LAURENCE CASTILLO

Cainta, Rizal, Philippines | +63 939 665 9628 | castillo.mlaurence.jobs@gmail.com | linkedin.com/in/castillo-mlaurence

PROFESSIONAL SUMMARY

Full-stack software developer with hands-on experience across the PERN stack, gained through an Agile development internship and multiple end-to-end web application projects. Comfortable owning work from responsive React front-ends through RESTful Node.js/PostgreSQL backends, with additional exposure to machine learning and embedded systems.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS, SQL, C++, C, Python

Frameworks/Libraries: ReactJS, Next.js, Node.js, React Native, Express.js, Tailwind CSS, DaisyUI

Databases: PostgreSQL, pgAdmin

Tools & Platforms: Git, Docker, Postman, Visual Studio Code, Vercel, Trello

Concepts: RESTful API Design, Agile/Scrum, Responsive Design, UI/UX Wireframing, Data Structures & Algorithms, Database Management

EXPERIENCE

Junior Software Developer Intern March 2026 – June 2026

Equitable Computer Services Inc. — Makati, NCR

- Developed and maintained React-based web applications following Agile/Scrum development practices.
- Designed responsive UI/UX wireframes and implemented reusable front-end components.
- Collaborated with Business Analysts to document software architecture, workflows, and technical documentation.
- Contributed to multiple web application projects, including an intern time and attendance system and the modernization of the MyHealthClinic website.

PROJECTS

GasMap — Community-Driven Gas Price Tracker

Full-Stack | PERN Stack | Leaflet

- Designed and developed a community-driven web application for discovering and comparing fuel prices across nearby gas stations.
- Built a responsive React/Tailwind frontend with interactive maps, filtering, and fuel price visualizations.
- Developed RESTful backend services with Node.js and PostgreSQL to manage stations, prices, and historical data.

Automated Abaca Fiber Classification System Aug 2025 – Jun 2026

Machine Learning | Embedded Systems | 3D Design

- Designed a precision 3D-printed mounting system for a custom polarimetric camera system.
- Deployed a cloud-accessible web application for real-time visualization and analysis of prototype-generated datasets.
- Built and trained a machine learning classification pipeline to automate feature extraction and improve classification accuracy.

Intern Time and Attendance Web System

System Design | ReactJS | HTML5

- Established the front-end architecture and development workflow, providing a scalable foundation for the project.
- Designed user-centered wireframes and interactive UI/UX prototypes that guided implementation.
- Produced technical documentation covering system architecture, workflows, and source code.

EDUCATION

Bachelor of Science in Computer Engineering June 2026

Technological Institute of the Philippines — Quezon City, NCR

Major in Intelligent Systems; Minor in Mathematics

Relevant Coursework: Data Analysis, Software Engineering, Operating Systems, Data Structures & Algorithms, Artificial Intelligence, Database Management Systems, Cisco Networking, Embedded Systems
